overview

make me furniture are designers who love and make furniture, you can see that through our detailing.

our beautiful library ladders have been designed to help you make the most of your interior space, we've worked hard over the years to make sure you get what you actually need rather than just what is available, we are very much design led and passionate that everything is made here in the UK.

we make in your measurements

all our ladders whether a hook-on shelving ladder or a rolling ladder on a corner fixing rail system are made to your dimensions. It may seem daunting at first glance but all we really need to know is how high and how wide and we work the rest out for you! we produce CAD drawings as part of the ordering process meaning you can always see what has been designed.

we make in your colour scheme

at make me we are set up for both metal and timber fabrication meaning it's unlikely you can describe a scenario that we can't then custom design and manufacture a beautiful hook-on or rolling ladder for you!

we work in the following materials to make your stunning library ladder and rail systems:

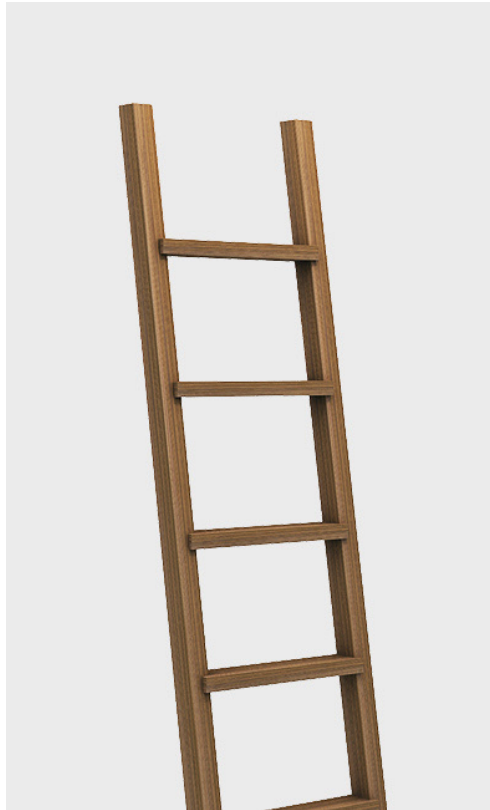

- hardwood timbers such as Oak, Walnut, Maple, Ash, Cherry
- aluminium
- mild steel with powder coat or blackening applied
- brushed stainless steel
- brass - usually as high polished or aged/antique finish
- bronze - usually dark or smoked finish

we make you love your space

a library ladder can become a fantastic addition to your living space and form a contemporary link to your existing furniture. we send our orders out so they can be up and ready to use with minimal work by you, ready for you to fall in love with!

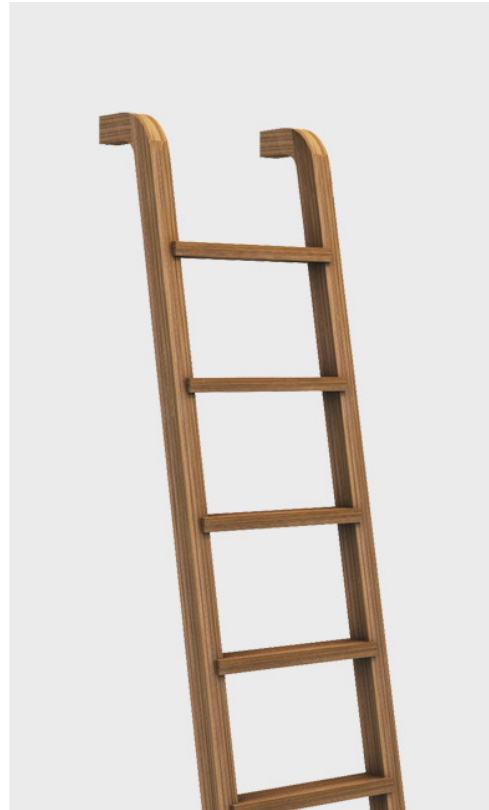

our ladders CHOOSE YOUR STYLE

F-II-01 LADDER STYLE

our go to library ladder. lean-to, hook-on or rolling library ladder, fully customised options and the rear top rest design can take our range of handrails, locating pins or rolling kits.

F-II-02 LADDER STYLE

curved simplicity, demountable mezzanine ladder with integrated rear top rest in various materials to creating a wooden library ladder, various finishes including customer colour choices or specific stains.

F-II-03 LADDER STYLE

'kinked' library style ladder for tighter spaces with vertical upright to limit protrusion into interior space, add our rolling kits to create a rolling wardrobe ladder on a straight run or as a rolling closet ladder round a corner.

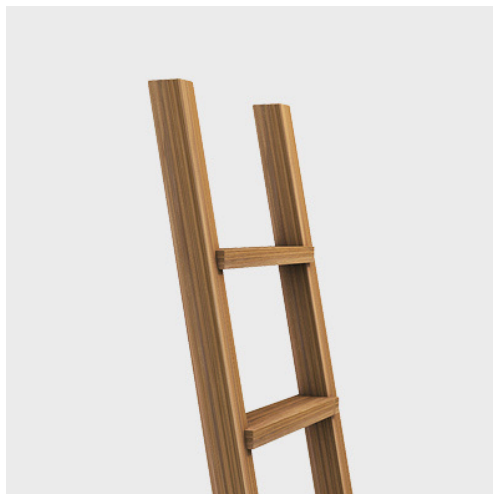

F-II-04 LADDER STYLE

bespoke metal ladder in aluminium, mild or stainless steel, aged, polished antique brass or bronze, available as lean to, hook-on or rolling ladders.

our ladders

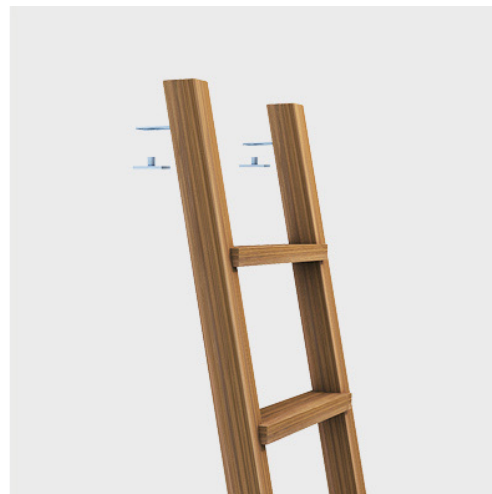

CHOOSE YOUR FUNCTION

LEAN-TO

available for all ladder styles.

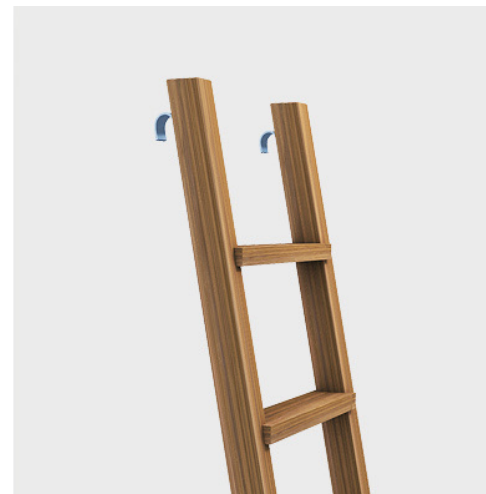

- rear top rest library ladder design can take our range of handrails, locating pins or rolling kits.
- ladder uprights and base can have cork added for extra grip and to protect floor surfaces ideal for kitchen ladders.
- use with our range of storage hooks and stow your bespoke timber ladder away in another room if needed.
- see our 'finish' section for endless options available for all our library ladders.

MEZZANINE

available for F-II-01, F-II-02 & F-II-04

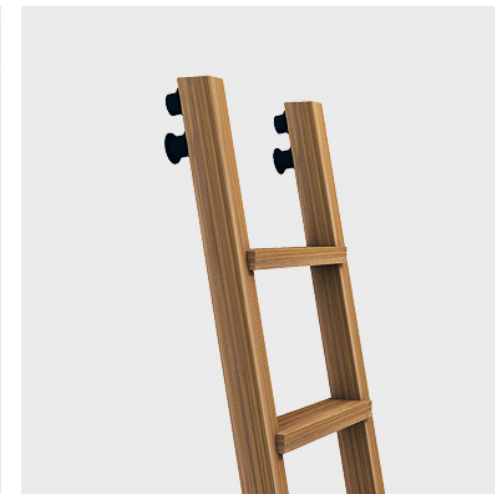

- rear top rest design uses our locating pins to enable removable support, pins are brushed stainless steel as standard, alternative finishes also available.
- mezzanine ladders can have cork added for extra grip and to protect floor surfaces
- utilise our handrail options in a range of finishes to complement your bespoke mezzanine ladder.
- see our 'finish' section for endless options available for all our mezzanine library ladders.

HOOK-ON

available for F-II-01, F-II-03 & f-II-04

- add hooks to the rear of your custom kitchen or pantry ladder in either matching timber or range of metal finishes.
- fixing rails for your rolling library ladder are in a range of metal finishes and with round or rectangular fixing brackets.
- use the same bespoke shelving ladder to reach different shelving units by simply hooking on and off.
- we can provide a second set of hooks on the ladder uprights to enable vertical ladder storage when not in use.

ROLLING

available for F-II-01, F-II-03 & f-II-04

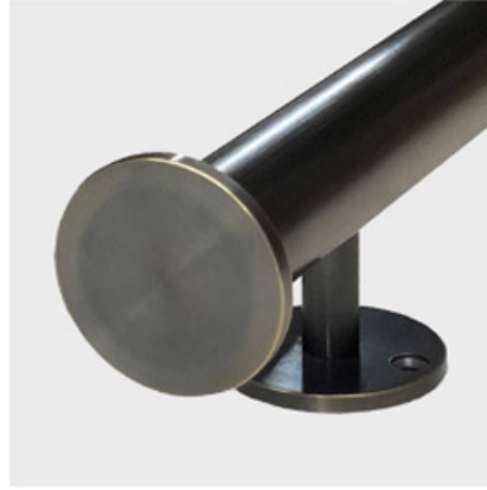

- use with our rolling kits to have wheels to the top only, top and base or retracting rolling kits for a stowaway vertical rolling library ladder.
- single straight run rolling ladders or bespoke ladders going round 1 or more corners.
- fixing rails in a range of metal finishes and with round or rectangular fixing brackets so your library ladder can fix to tall shelving.
- fixing rails are supplied either as flat bar or round bar, the retracting kit is for round bar ladders only.

our ladders CHOOSE YOUR FIXING RAILS

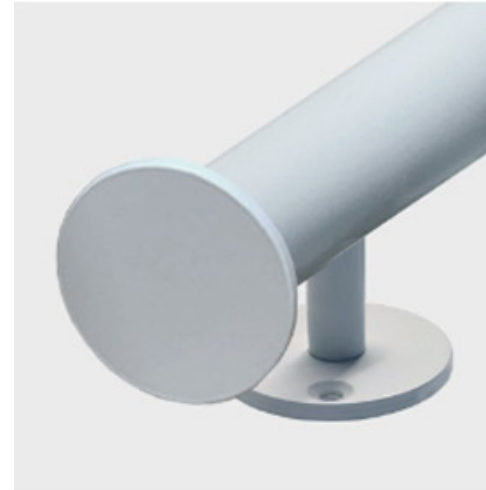

BRUSHED STAINLESS STEEL

one of our beautiful traditional finishes where the fixing rails and brackets are hand etched to create a soft brushed finish to the metal.

BRASS / PATINA

working in actual brass never plated, we love the natural lustre brass has as a material and how it can be finished in a large range of colours and tones, our usual requests are aged, antique and smoked bronze, all finishing is hand applied.

POWDER COATED

giving real freedom to interior designers, specifiers, builders and home owners, the RAL colours available are almost limitless! popular colours are blacks, whites, greys and bronze. we prime and dual coat our powder coated finishes onto quality mild steel to give a durable coating.

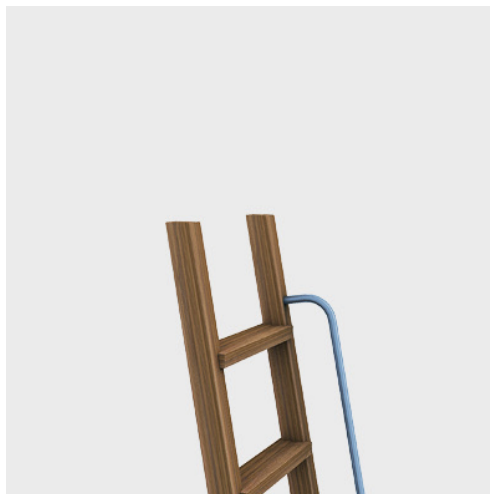

BRASS / POLISHED & BRUSHED

in addition to our patina finishes we can also make beautiful brass with either a satin, satin brushed or high polished finish, being worked on in-house means we can match in to whatever you need in your interior scheme.

our ladders

CHOOSE YOUR HANDRAIL

STANDARD LOOP

various finishes available to suit your space

- 1170mm L standard length, made in house so alternative dimensions are no problem, just ask us for details..
- use a single or double handrail on your library ladder, great for kitchen ladders where you're reaching for items with one hand.
- finishes include: polished brass, aged antique brass or bronze, blackened steel, brushed stainless or powder coated (from RAL classic range), additional colours may carry a surcharge.

LOOP WITH RETURN (STRAIGHT)

ideal for mezzanine ladder access

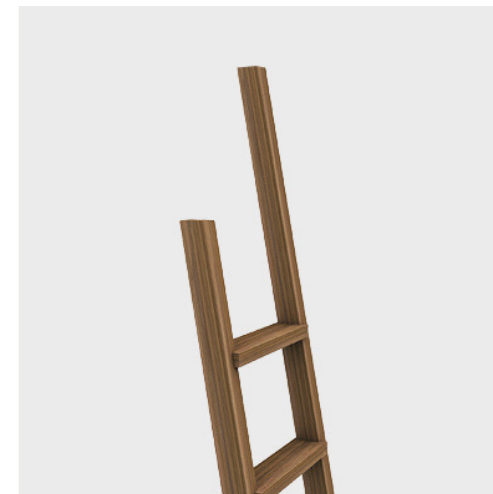

- 1800mm L as standard, made in-house enabling bespoke dimensions.
- handrail is brushed stainless steel as standard, multiple finishes also available.
- return section to handrail helps with mezzanine access as grab rail.
- separate 'grab rail' can be made to work alongside your mezzanine ladder.
- see standard loop handrail for finish details, large range to suit your colour scheme

LOOP WITH RETURN (ANGLED)

ideal for mezzanine ladder access

- 1800mm L as standard, made in-house enabling bespoke dimensions.
- handrail is brushed stainless steel as standard, multiple finishes also available.
- return section to handrail helps with mezzanine access as grab rail.
- separate 'grab rail' can be made to work alongside your mezzanine ladder.
- see standard loop handrail for finish details, large range to suit your colour scheme

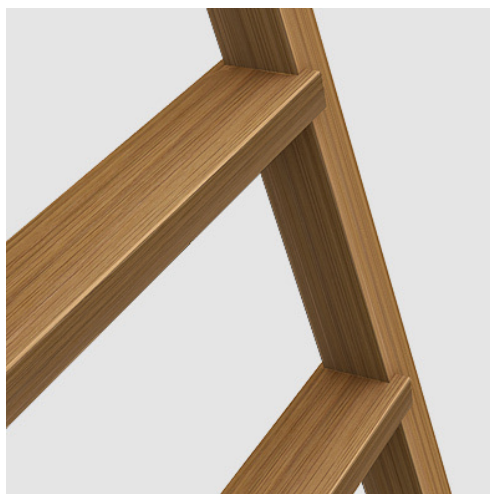

TIMBER EXTENSION

extends ladder upright to create handrail

- 700mm L standard extension length, all our ladders are made in house so alternative dimensions are no problem, just ask us for details.
- we can also supply separate 'grab rail' handrail to work alongside your mezzanine or bookcase ladder.
- handrail is using the same ladder upright material but extended.

our ladders

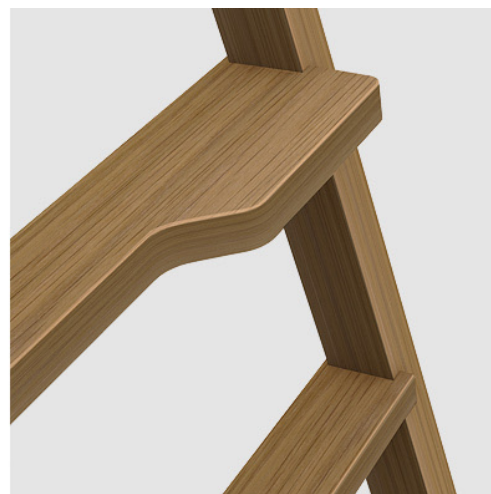

CHOOSE YOUR TREADS & GRIPS

STANDARD

390mm x 75mm x 28mm

- all treads are supplied in our standard size unless otherwise requested.
- treads can be supplied in different timber to ladder uprights whether uprights are timber or metal, ask for details.
- timber treads can be supplied in ash, oak, walnut, iroko, cherry, black walnut to name a few of our popular timbers, contact us if you have a specific request for your bespoke library ladder.

PADDLE TREAD

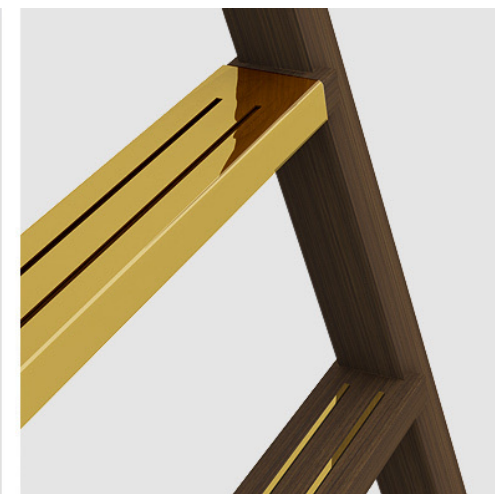

390mm x 140mm x 28mm

- paddle treads are right hand set to the base unless otherwise requested.
- paddle treads are alternated on their position to create more cover under foot when using your wooden library ladder.
- all treads are supplied in our standard size unless otherwise requested.
- treads can be supplied in different timber to ladder uprights whether uprights are timber or metal, ask for details.

ROUTERED TREAD

- we router two channels into the tread to help with grip
- great option to help children beds decks or mezzanines where you may be wearing socks!

CUSTOM TREAD

treads can be different to the main ladder uprights, we can 'cap' treads with folded metal such as powder coated mild steel or aged or high polished brass.

we can also add brass rods such as antique brass to sit within our routered tread grooves to create a beautiful material mix

our ladders

CHOOSE YOUR MATERIAL & FINISH

at make me we are set up for both metal and timber fabrication meaning we can help with your project no matter what is required.

a lightweight aluminium library ladder is ideal for carrying between spaces in your home fully powder coated in a huge range of colours, or perhaps a mild steel rolling ladder for your shelving. we can also make a stunning stainless steel library ladders either as a hook on, rolling or lean to ladder.

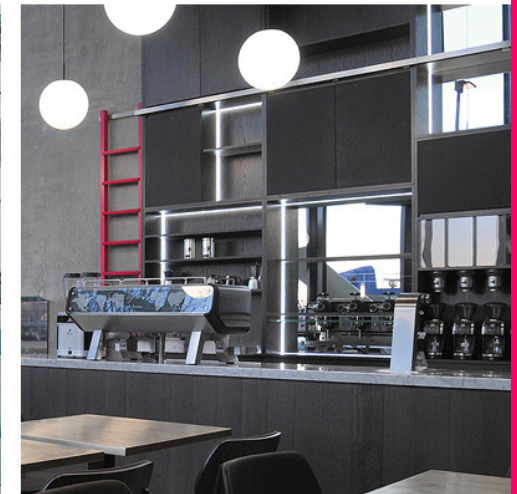

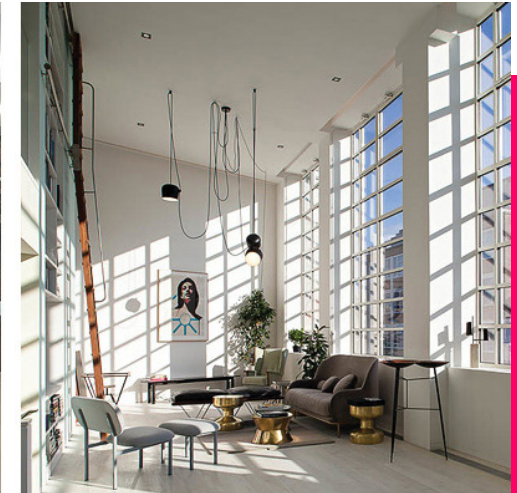

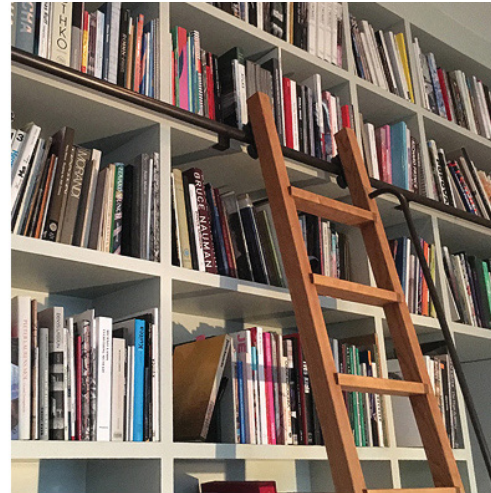

we also work in stunning brass and bronze and can make a full ladder such as an antique aged brass rolling ladder or a hook-on smoked bronze kitchen ladder. brass and bronze can be finished to suit your light switches or door handles helping match in with your colour scheme and all fixing rails or components will be finished in the same hand applied method.

our timber or wooden library ladders are generally always in hardwood, we can use utile for an outdoor custom rooftop access ladder and use our mechanism to store it flat when not in use. Our most popular library or shelving ladders are in Oak, Walnut or sprayed Ash or Maple, but we have made many other ladders to tie in with cupboards for kitchen ladders or pantry access ladders.

Our spray shop can colour match to Farrow and Ball, Little Green Company or any other stain or colour you can give us a reference to, if not we can get samples made up ready for approval.

projects SOME EXAMPLES

about us

it all started many, many years ago at University thinking about how when you're looking for furniture you always want it to 'just be' maybe taller, shorter, deeper, different timber and so on and that's how we got our name 'make me', the basis of us being able to 'make you' whatever furniture you need!!

we are UK designers and makers who are passionate about designing bespoke furniture to meet your needs, over the years we have evolved into ladder specialists having provided ladders for over 500 projects across both commercial and domestic markets. Working with both timber and metal we can make exactly what suits your space, whatever the style of ladder whether a shelving ladder, pantry access ladder, rolling library ladder or a step stool.

Our long term goal is to produce timber based products which are independently certified as originating from sustainably, managed forests to manage and control our environmental risk in a sustainable manner by complying with all relevant legislation and adopting where appropriate best practice.

our products

our custom made rolling and shelf ladders are used in projects for both home users and high end commercial restaurants for spaces including children's bed decks, alcove shelving, kitchens, pantry's and mezzanines, roof terraces, wine stores and gin bars. Every part of our ladder and rail systems are UK made, something we are very passionate about here at make me.

Our ladders are termed as domestic class as every project we do is different so we cannot get them kite marked like you would with a aluminium access ladder. We've been making our wonderful ladders since 2009 and have an endless list of happy customers.

our process

once you've looked through the website and decided on your specification for your library ladder, get in touch, if you have photos of the space you are looking to have your bespoke furniture positioned then email it over to help us work with you. If you have specific space requirements for your mezzanine or library ladder or any other bespoke furniture piece then have them to hand as this will make it easier for us to get you the help you need.

We can also create 3D visuals of your design prior to ordering and pride ourselves on accurate photo realistic images. All orders are provided with a signoff CAD drawing which we send to you to check against your space requirements.
